## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 16, 2009 has been entered.

Claims 1-2, 10 and 17 are amended.

Claims 1-3, 5-7, 9-12, 15-17, and 19-22 are pending and herein considered.

### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Rook on August 6, 2009.

The application has been amended as follows:

Please replace claims 1 and 2 of Applicant's current claim listing with the following:

1. (Currently Amended) A system including a computer hardware device for addressing denial of service attacks directed at a web resource, comprising:
  - a detection system for detecting improper requests; and
  - a response system for responding to improper requests ~~that issues an HTTP "OK" response code when an improper request is detected~~, wherein a request is deemed improper if a message body associated with the request has a zero length, and wherein the response system includes a response protocol that utilizes a standard error handling procedure for a first improper request from a requesting resource, issues an HTTP "OK" response code for N subsequent improper requests from the requesting resource, and then stops responding to the requesting resource altogether.
2. (Currently Amended) The system of claim 1, wherein the response system ~~for~~ responding stops issuing HTTP "OK" response codes and issues no response after a predetermined number of improper requests are detected.

***Allowable Subject Matter***

Claims 1-3, 5-7, 9-12, 15-17, and 19-22 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed towards a system, method, and computer program product for addressing denial of service attacks directed at web resources. Independent claims 1, 10, and 17 each identify the uniquely distinct feature of: detecting improper requests and in response to determining that a request is improper utilizing a standard error handling procedure for a first improper request, an HTTP "OK" response code for N subsequent improper requests, stopping responses altogether thereafter.

The closest prior art, United States Patent No. 6,202,087 to Gadish, discloses a system and a method for replacing error messages with non-error messages. Gadish fails to disclose utilizing a standard error handling procedure for a first improper response, an HTTP OK" for N subsequent responses, and then no response at all thereafter. The prior art, either singularly or in combination fails to anticipate or render obvious the present invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
